Knowledge is extolled by everyone, knowledge is considered great everywhere, one can attain everything with the help of knowledge and a knowledgeable person is respected everywhere.

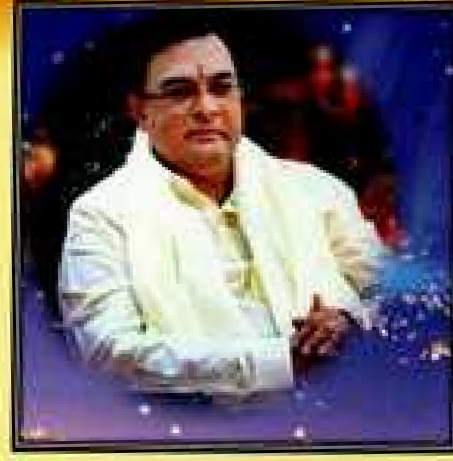

'The function of education is to teach one to think critically. Intelligence plus character-that is the goal of true education'.

A child needs a model and not a critic. BGS National Public School identifies the talent in each child and inspires in honing the same. Keeping up the standards of academic excellence, the school remains rooted in the cultural aspects and moral ethics. The strong points never go unnoticed and ample opportunities are provided for the holistic development of a student.

Dear students! Motivation is what gets you started. Habit is what keeps you going. You are privileged as this school imparts education which is not a rote-based learning but each day unfurls new activities and challenges. You will be thrilled with the joyous journey of critical thinking skills, creative writing, confidence building and teamwork be it class work or home tasks. Sheer hard work is the only key to success. No rocket science is applicable. Avail all the opportunities that come your way to stand out as responsible citizens.

"Teaching is the one profession that creates other professions". Hence, in a heterogeneous crowd, one needs to take the extra mile to make the sessions interesting. It is the cardinal concern of the teacher to see that none is left behind and all come out with flying colours.

I wish you all the best and hope you make us feel proud!

**"When you educate one person, you can change a life
When you educate many, you can change the world."**

All of us have been created nobly. We all have been given talents and gifts that can be used to benefit the world of humanity. These qualities are latent in every child, but they need to be developed. Education, alone, can cause it to reveal its treasures, and enable mankind to benefit therefrom.

A child learns what he lives, and BGS National Public School strives for a more peaceful world, where spiritual principles guide the students' actions and decisions. Here, the children are brought up through prayer, love, hard work and sincere efforts. We believe these qualities are necessary for the education of our children.

Teachers play an important role as well, they impact what and how the students learn everyday with a holistic perspective. They are concerned with the development of every student's intellectual, emotional, social, physical, creative, spiritual and artistic potential. Our team of effective teachers show their willingness to contribute beyond the scope of the classroom and play an important role in character development and the shaping of the students' reputation, honour and integrity.

Think different and go after the excellence; do something that makes your name stand out in a crowd. Best of luck.
